HOTEL OPTIMIZER

Hotel Optimizer is a state-of-the-art online platform that reports on a hotel's sustainability and environmental performance; it evaluates energy and water consumption, waste creation, costs and carbon emissions. It then benchmarks the hotel's performance with similar properties, and evaluates its genuine performance taking into account variations in its operations. The platform also analyses the hotel's performance using a strong engineer methodology of data analysis, and provides recommendations for improvement based on this analysis.

The Hotel Optimizer platform includes three modules; **energy and water management, waste management and carbon emissions.**

HITEK

The evolution of technology continues to change the way businesses work. Companies that want to excel in their industry sectors must embrace HITEK technologies. HITEK is a suite of intelligent Smart & Green solutions, providing businesses with a holistic approach, connecting support to operational units and Management to Workforce. This bridges potential communication and information gaps, producing the ultimate productivity and efficiency outcome, which today is a prerequisite.
